

Personal Tracker and Messenger

Connect with Your Workers
Anywhere in the World

Secures Your Organization Worldwide

In today's world where employees need to travel to remote and sometimes dangerous locations, Honeywell delivers a rugged technology for connecting and managing your remote organization.

Messaging -
Communicate securely with employees anywhere

When paired with a smartphone via Bluetooth, the Personal Tracker allows remote workers to communicate with each other and with the organization.

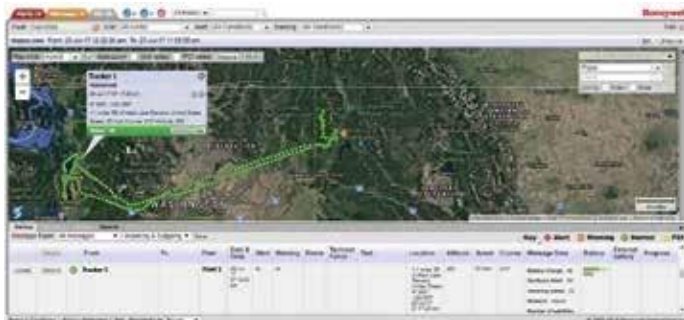

Alerting -
Respond rapidly to emergency situations

Workers can send emergency alerts via the Personal Tracker's dedicated SOS button or via the smartphone app. The SOS feature allows for immediate alerting of your location and need for assistance.

Tracking -
Protect your employees, protect your organization

The Personal Tracker can be configured to report worker location from 2 minutes to 24 hours from your smartphone app or the web-based application called ViewPoint.

ViewPoint Web Based Application

- Web-based platform that provides organizations with real-time visibility for tracking and monitoring people and high-value assets
- Enables employers to view current location data for workers online
- Allows for broadcasting of urgent messages
- Emergency contacts are automatically notified by SMS and/or email in the event of an alert situation
- Location and messaging data is easy to integrate into enterprise applications and ERP systems

A Full-Featured Satellite Personal Tracker System

Honeywell's Personal Tracker is a comprehensive tracking and messaging solution with these components:

- Two-way tracking and messaging device that can be used stand-alone for simple tracking and SOS or connected to a smartphone app via Bluetooth for additional features
- IP67-rated which allows for the device to be waterproof to 1 m (3.3 ft) depth for 30 minutes
- MIL-STD 810G for drop protection up to 1.2 m
- C1D2 certification for hazardous areas
- Stealth mode operation turns visual indications off and can be used for discrete use or to extend battery life
- Includes rechargeable battery, which will last up to a week at longer reporting rates

Personal Tracker App

- Free downloadable app
- Enables workers to send and receive text messages using an intuitive interface
- Write text messages (up to 90 characters) or select one of 50 user defined pre-set messages
- Allows for interactive SOS messaging to ensure that the proper support is provided based on the emergency situation
